EDUCATION

Aditya University

Bachelor of Technology in Computer Science, CGPA: 8.0

Andhra Pradesh, IN

Oct. 2022 – May 2026

EXPERIENCE

Software Engineer Intern

PASS Consulting Group

Oct. 2025 – Present

Remote (Germany)

- Developed enterprise-grade travel modules using Spring Boot microservices and Flutter, improving data retrieval speed by 20% through PostgreSQL query optimization.
- Managed end-to-end task lifecycles in an Agile/Scrum environment, utilizing Jira to maintain a 100% sprint completion rate over 3 months.
- Interfaced with German stakeholders to translate complex business requirements into technical specifications, aligning delivery with international client standards.

Full Stack Mobile App Developer

Technical Hub

Aug. 2025 – Nov 2025

Andhra Pradesh, IN

- Built a production HRMS mobile app using Flutter and Express.js, automating payroll for 500+ employees.
- Reduced manual HR processing errors by 30% by architecting automated approval workflows and RESTful APIs.
- Optimized data persistence using MongoDB, reducing application latency by 15%.

Generative AI Intern

IL Talentfarm LLP

May 2025 – July 2025

Hyderabad, IN

- Architected "Learnora," a GenAI learning platform, integrating Hugging Face transformers and PyTorch for real-time NLP recommendations.
- Scaled backend services using Flask and React, resulting in a 40% increase in user engagement through personalized ML-driven paths.

PROJECTS

THAL AI | Flutter, Firebase, RevenueCat, n8n

October 2025 – Jan 2026

- Implemented a nutrition-tracking app with MVC architecture, achieving 90% crash-free users via Firebase Crashlytics.
- Integrated subscription-based monetization via RevenueCat and automated backend workflows using n8n and Firebase.
- Built the application end-to-end as a solo developer, following clean MVC architecture and production-level code practices.

GoLeague | Flutter, Spring Boot, AWS, Redis, Kafka, ELK, Docker Swarm

December 2025 - Present

- Built and deployed a production-grade sports management platform using Spring Boot microservices and Flutter, supporting club, league, team, and invoice workflows for real-world organizations.
- Improved backend scalability and reliability using Redis caching, Kafka asynchronous messaging, and centralized ELK logging, enabling faster debugging and stable inter-service communication.
- Automated CI/CD pipelines with GitHub Actions and managed containerized Docker Swarm deployments, ensuring reliable microservice releases and operational stability.

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript, C/C++

Frameworks & Backend: Spring Boot, Microservices, REST APIs, Express.js, FastAPI, Flutter, React

Databases & Messaging: PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka

DevOps & Tools: Git, GitHub Actions, Docker, Docker Swarm, AWS, ELK Stack, Postman, IntelliJ, VS Code

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Linux

CERTIFICATIONS

AWS Certified Cloud Practitioner - EC2, S3, IAM, Lambda.

Jun 2025
